

Scholar Academy 2026
Year 5 Personalised Learning Journey

Vision: Ignite Curiosity, Empower Voice, Inspire Excellence

Our Mission: Learning Your Way

Term 1 Science Provocation Quest

Over the holidays students can get a head start on their Science learning for Term 1 using the below Inquiry Question. This is completely student-driven and is designed to spark curiosity and allow students to explore key ideas ahead of next year's learning.

Students can present their findings in any way they would like but some ideas could be:

- Digital poster or infographic
- PowerPoint
- Short video
- Concept maps or mind maps
- Blog post

Our Big Question

How does weathering, erosion, transportation and deposition cause slow and rapid changes to the Earth's surface?

1. View this video as your first step in your Science quest

<https://www.bing.com/videos/riverview/relatedvideo?q=nsw+beach+erosion+abc+news&mid=22AACC6F0EE47CC33AC622AACC6F0EE47CC33AC6&FORM=VIRE>

2. Think about the big inquiry question and following sub-inquiry questions:
 - What is weathering, erosion, transportation and deposition?
 - How are we effected personally by these changes to Earth's surface?
 - What can we do to help?
3. Decide how you would like to present your findings
