

# Curriculum Overviews

Year 5

Term 2, 2026

## Mathematics

Students learn strategies for converting between 12- and 24-hour time. In Number, they further deepen their knowledge of place value and the four operations. They calculate the factors and multiples of numbers and apply knowledge of the four operations to solve word problems.

## English

Students engage with a range of informative texts. They explore language features, text structure features and visual features used in informative texts. They read and comprehend these types of texts as well as using these as models to create their own.

## HASS

This term, students will learn about Australia's democracy, including the key values and processes that support a fair and just society. They will explore the roles of different people within Australia's legal system and how laws are applied. Students will also examine how to respond to issues or challenges by considering different perspectives and possible actions.

## Science

This term, Year 5 students will explore how the physical features and behaviours of living things help them survive in their environments. They will examine the real-world examples of how scientific knowledge influences human actions, particularly in caring for and protecting living things.

## Health & Physical Education

This term in Health, students will explore how people, places and experiences influence their sense of identity. They will learn about different cultures by examining how sharing traditional foods and participating in cultural physical activities can strengthen community wellbeing and understanding. In Physical Education, students will apply the elements of movement to create and perform their own movement sequences.

## The Arts

In The Arts this term, students delve deeper into Music. They explore elements of music such as ostinato, melody and accompaniment.

## Japanese

Students are introduced to Hiragana and Katakana. They develop these skills through writing a letter sharing information of themselves and their families.

## Technology

In Design Technology students explore engineering principles to plan, design, create and test a flying object while considering ethical, social and sustainable influences.
