Scholar Academy 2026 Year 6 Personalised Learning Journey

Vision: Ignite Curiosity, Empower Voice, Inspire Excellence

Our Mission: Learning Your Way

Term 1 Science Provocation Quest

Kickstart your scientific thinking for Year 6 with a thought-provoking challenge linked to our Term 1 and 2 Science themes. Students can investigate, wonder, sketch, research or simply start thinking about the big questions that shape chemistry and biology.

These provocations give students a fun way to arrive ready to share ideas, demonstrate their understanding and jump straight into inquiry learning in 2026.

Academy T-Shirt Design Challenge

Every great team needs a symbol and ours comes with a burst of energy!

The 2026 Academy T-shirt should represent curiosity, momentum and the spark that happens when imagination meets STEM thinking.

Students are invited to create their own concept for the Academy shirt - bold, clever, quirky, STEM-themed, comic-inspired... anything that reflects the spirit of exploring boldly and learning playfully and designed especially for our inaugural cohort. Students will wear it for Academy days, STEM challenges, excursions and special projects throughout the year.

It's more than a shirt! **It's a badge of belonging, a spark of identity and a reminder to explore boldly and learn playfully.**
