

Curriculum Overviews

Mathematics

Students learn to compare and order the duration of tasks. They also create patterns and practise skip counting to count groups of objects more quickly and accurately. These skills help children understand measurement concepts and build a strong foundation for more complex maths in the future.

Year 1

Term 4, 2026

English

Students develop their reading and comprehension skills by exploring more complex texts. They make connections between characters, settings, and events, and learn to recognise simple story structures and features that make stories interesting. In writing, students create recounts of stories, including key events and characters. They practise writing simple sentences with correct punctuation, capital letters for names, and words related to the topic to make their writing clear and engaging. These activities help children become confident readers and writers who can understand stories and express their ideas clearly.

HASS

Students begin to explore their local neighbourhood in more detail. They are encouraged to ask questions, investigate, and learn about the different kinds of features that make up the places around them. They recognise different types of features in their local area, including: natural features, managed features and constructed features.

Science

Students will engage in hands-on science experiences that encourage curiosity, exploration and discovery about the world around them. They will have opportunities to observe, explore and investigate everyday objects, materials and natural phenomena through practical activities and guided investigations.

Health & Physical Education

Students learn to understand health messages and describe ways to keep themselves and others healthy, safe, and active. They also practise positive ways to interact and cooperate with others during physical activities, building teamwork and respect. These skills support their overall wellbeing and help them make good choices both in and out of school.

The Arts

In this term's Music unit, students explore how music brings people together to celebrate Christmas in different cultures around the world. In Drama, students explore stories and familiar texts as inspiration for play and performance. They unpack characters and storylines to create dramatic actions, using voice, movement, and imagination to bring stories to life.
